DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks on pages 2-5, filed on January 15, 2009, with respect to claims 1-19 have been fully considered and are persuasive. The 103(a) rejections of claims 1-16 have been withdrawn.
2. Acknowledgement is given to canceled claims 1-4, 6, 10, 11, 15-18, 23 and 24.

Allowable Subject Matter

3. Claims **5, 7-9, 12-14** and **19-22** are allowed.
4. The following is an examiner's statement of reasons for allowance:

As to claim 5, the prior art of record, taken alone or in combination, fails to disclose or render obvious a first recognition step wherein a positional value and a characteristic value on an orthogonal coordinate of the identification particles within the random type recognition object produced in the random type recognition object-generating step are recognized from one or a number of directions on the orthogonal coordinate to complete a first data set; a second recognition step wherein the positional value and the characteristic value on the orthogonal coordinate of the identification particles distributed within the random type recognition object in which the first data set is completed in the first recognition step are recognized from one or a number of directions on the orthogonal coordinate to complete a second data set as clearly shown, in combination with the rest of the limitations of the claim.

As to claim 7, the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein the recognition object is a random type recognition

object in which identification particles are irregularly distributed within a 3D shape, and a positional value and a characteristic value of the identification particles distributed within the 3D shape are recognized from one or a plurality of directions by means of the recognition apparatus as clearly shown, in combination with the rest of the limitations of the claim.

As to claim 12, the prior art of record, taken alone or in combination, fails to disclose or render obvious three dimensional identification particles and associated first and second data set and positional value and characteristic value to be recognized from one or a plurality of directions on an orthogonal coordinate as clearly shown, in combination with the rest of the limitations of the claim.

As to claim 20, the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein identification particles are irregularly distributed within a 3D shape, and a positional value and a characteristic value of the identification particles distributed within the 3D shape as clearly shown, in combination with the rest of the limitations of the claim.

And as to claim 21, the prior art of record, taken alone or in combination, fails to disclose or render obvious wherein the recognition means recognizes the positional value of the identification particles and a characteristic value of the identification particles at the same time as clearly shown, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Reference **2007/0170257** teaches an authentication method which is based on an authentication object, such as an authentication label, having a three-dimensional pattern of distributed particles.

However, it fails to disclose the limitations cited above in 5.
